

## Is It Possible to View How Much Data is Being Transmitted by SoftLINK?

### Summary

It is possible to view how much data is being transmitted and the compression rate between the SoftLINK Client and Tutor while viewing the client workstation.

### Details

If you would like to see how much data is being is transmitted while viewing a client, do the following:

1. While viewing a client select {help} {about} at the top of the view session
2. Next select the {Compression} tab

This tab will provide you with all the details regarding the amount of compressed and un-compressed data that has been transmitted between the Tutor and Client PC during the current session. Later releases of SoftLINK also have a reset button so that you can reset the counters.
