

Explorer related Windows Group Policy Settings are no longer enforced after installing SoftLINK 10.70.0005 Student

Summary

An issue has been found whereby Explorer related Windows Group Policy settings are no longer enforced on a machine after installing the Student Component of SoftLINK version 10.70.0005 only.

The problem found relates to the PluginDevicesModule.dll file installed with the SoftLINK Student component.

Details

An updated version of SoftLINK 10.70.0006 has been released containing an updated PluginDevicesModule.dll to resolve the issue found.

Update to the latest version of SoftLINK to resolve the problem. Please download the updated installer from <http://www.acs-linksystems.com/products/softlink.cfm>.
