

How to Restrict the SoftLINK Tutor Console to Display Only the Student Chromebook Functionality

Summary

When using the SoftLINK Tutor Console to connect to only Google Chromebook Students it is possible to apply a registry value to the Tutor Console in order to restrict the Tutor Console User Interface to display only the features supported by Google Chromebook Students.

Details

Please find below details on the registry value to apply to the SoftLINKTutor Console in order to restrict the Tutor Console user interface to Google Chromebook functionality only.

1. Open Regedit on the Tutor Console
2. Browse to the following registry key location (If the below registry key does not exist please create this):

HKEY_CURRENT_USER\Software\NetSupport Ltd\PCICTL\ConfigList\SoftLINK Class Control

3. Next add the following registry value to the above location:

Value Type: String

Value Name: UI\ChromeUI

Value: 1

4. The next time you open the SoftLINK Tutor Console the features will be restricted to the Chromebook Student functionality only.
